

Bearing assemblies made of plastic (POM), toothed gear Type LVM

Franke LVM type bearing assemblies offer all the advantages of wire race bearing technology combined in a lightweight plastic housing with external toothing.

Description

Franke LVM type bearing assemblies are ready-to-install bearings with housing rings made of plastic (POM), integrated bearing elements and external toothing. Franke LVM are suitable for medium rotational speeds and accuracies. Designed as 4-point bearings, they absorb equally high loads from all directions and are insensitive to shocks and vibrations. LVM bearing assemblies are insensitive to environmental influences and can also be used in food technology and pharmacy.

PLEASE NOTE: Plastic bearing assemblies are available from quantities of >20 pieces. For smaller quantities, we offer you bearing assemblies with housing rings made from 3D printing. On request, also customised to your further design. We will be happy to advise you!

Technical data

Material

Inner/Outer ring: Polyoxymethylene (POM) Ball races: Non corrrosive Steel (1.4310) Rolling elements: Non corrosive Steel Cage: Polyamid (PA12)

Gearing

AT-10

Operating temperature

-10 °C to +80 °C, short-term up to +100 °C

Peripheral speed

Max. 4 m/s

Lubricant

Klüber UH1 14-151

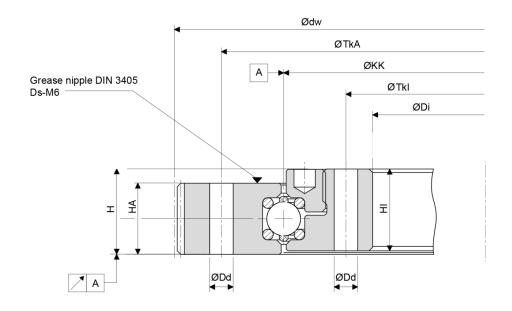

Relubrication

Via grease nipples to DIN 3405

Bearing assemblies made of plastic (POM), toothed gear Type LVM
